

## ADESOMODE 1500

ADESOMODE 1500 is a self-adhesive, cold applied SBS modified waterproofing membrane, with a polyester carrier. It has a release film on the under layer while the upper surface is covered with high density polyethylene.

## USES

- Waterproofing for raft foundations.
- Retaining walls.
- Bathrooms, kitchens, and wet areas waterproofing.
- Base layer in double layer roofing/waterproofing system applications.
- Waterproofing of roofs.

## ADVANTAGES

- Easy to apply.
- High mechanical properties.
- Absolute impermeability to water.
- Excellent low temperature performance.
- Excellent adhesion on any surface.
- High dimensional stability.
- Environmentally friendly.
