

NIROL-W

Is a stable, water-soluble emulsion of bitumen, resins, mineral stabilizers.

PROPERTIES & ADVANTAGES

- It is cold applied on horizontal or vertical surfaces.
- Has an excellent and strong adhesion on structural materials such as (concrete, metal, wood, bricks, etc.).
- When it dries, it gives a strong shining black membrane.
- It is not affected by weathering conditions.
- Resists attack of chlorides and sulphates likely to be present in ground water.
- Solvent free.
- Easy to apply without any heating; thus, it is economic in cost and labor.
- Environmentally friendly.

USES

As a damp proof coat for:

- Concrete and masonry.
- Foundation footings.
- Ground beams.
- Retaining walls and basements.
- Priming coat for general uses.
- Protective coating for concrete.

SPESECIFICATION

Complies with ASTM 1227 type III class 1 and DIN 18195 part 2.
