

NIROL-S

Is a cold applied ready to use bituminous primer coating with excellent adhesion, based on selected bitumen blended with special petroleum solvents and additives.

Properties and advantages

- Single component.
- easy applied.
- ready to use.
- Creates good adhesion and bond between the membrane and the substrate.
- good penetration behavior with surface pores of concrete to ensure optimum adhesion.
- high coverage rate.
- good dust absorption property, hence preparing the surface for effective bond between the substrate and membranes.

USES

- As a primer under waterproofing membrane NIROL-S is designed to provide a good cold applied primer coating compatible with BITUMODE and HYPERFLEX membranes or any other types of torch applied membrane.
- As a coating, NIROL-S can be used as a protective coating
- For foundations for building facades (under curtain walls) and other structural components.
-

SPECIFICATION

Complies with ASTM D-41
