

NIROL-R

Is a cold applied bitumen rubber latex and liquid emulsion.

PROPERTIES & ADVANTAGES

- It is cold applied on horizontal or vertical surfaces.
- Has an excellent and strong adhesion on both dry and humid substrates.
- When it dries, it forms a rubber, elastic membrane which has high expansion and contraction properties depending on film thickness.
- It is not affected by weathering conditions.
- Solvent free.
- Easy to apply without any heating; thus it is economic in cost and labor.
- Environmentally friendly.

USES

- Foundation footings.
- Ground beams.
- Retaining walls. basements and underground structures in contact with ground water.
- For building facades (under curtain walls) and other structural components.

SPEIFICATION

Complies with ASTM 1227 type III class 1 and DIN 18195 part 2.
